

Easy Reach tool

for TAWI Mobile Order Picker

Reach all the way into pallet racks without bending. The Easy Reach tool on TAWI Mobile Order Picker enables the operator to stand comfortably in the aisle while lifting goods at the back end of a pallet.

TAWI Mobile Order Picker (MOP) is a mobile vacuum lift unit compatible with any LLOP. The order picker allows you to move quickly from pallet rack to pallet rack, picking goods onto pallet with minimal physical effort.

Using a mobile order picker with the Easy Reach tool, the operator can easily reach into pallet racks, picking goods from the back end of a pallet without moving a muscle. The order picker is easily adjusted in height to match the height of your pallet racks. A simple push of a button will raise or lower the lift tower, allowing the lifter to reach into your racks.

Easy Reach is a unique tool that enables lifting inside a pallet rack or other cramped space without physical effort. The Easy Reach tool saves the operator from lifting in uncomfortable positions which will effectively prevent musculoskeletal disorders (MSDs) and create a safe and ergonomic work environment where everyone can lift.

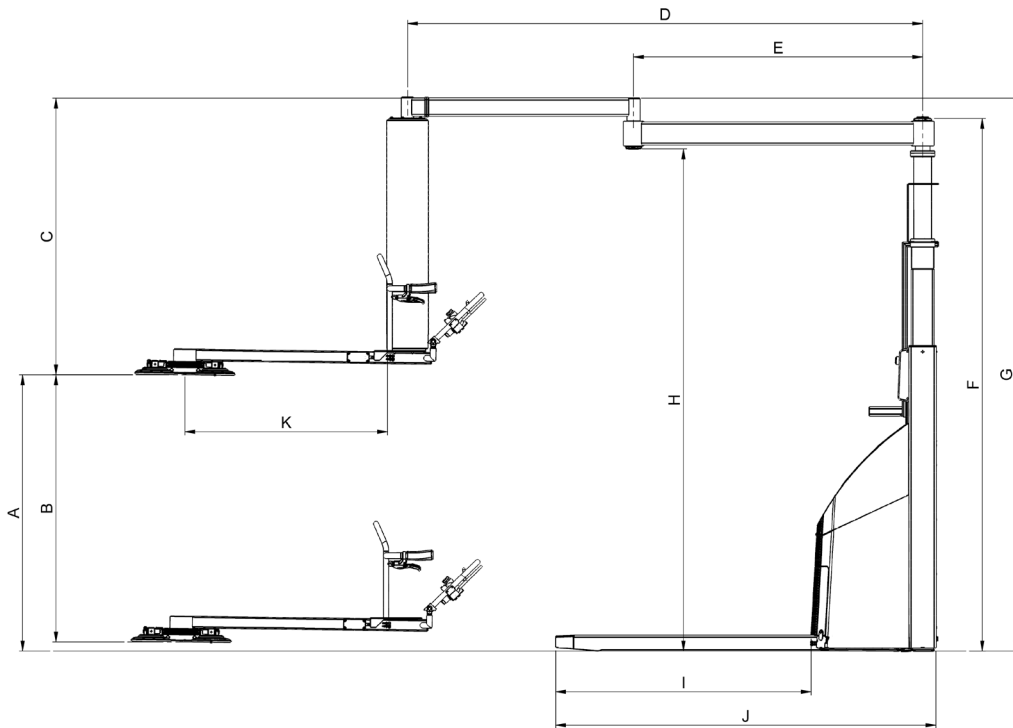

The tool helps eliminate team lifts, enabling one person to do what used to be a 2-man job. It also eliminates the need for storing goods outside of pallet racks as workers can now easily reach into pallet racks to pick goods.

Lift capacity	<50kg
Reach	1 meter from lift tube
Working area	4-meter diameter
Height adjustment	500mm height adjustment on MOP unit
Safety	Safety lock holds arm in place when moving the unit
Compatibility	MOP unit is compatible with any forklift or LLOP
